The Events Resource Management Plan tool is a free online tool which can be used by event organisers and suppliers to create an action plan for managing event waste.

The tool will help you to:

- Develop a waste management strategy
- Identify the types of waste that will be generated from your event
- Identify resource efficiencies which can lead to cost savings
- Identify opportunities to reduce waste and increase reused and recycled content
- Communicate your waste management targets to your supply chain
- Capture waste measurements and provide an event waste report

This system can support your implementation of BS8901 sustainable event management system as part of your action plan to address waste issues.
